March 20, 2026

Dear Chairman Cole and Ranking Member DeLauro:

I am requesting funding for Stony Point Wastewater Headwork in Fiscal Year 2027. The entity to receive funding for this project is the Town of Stony Point located at 74 East Main Street, Stony Point, NY, 10980. The funding would be used to construct a new municipal headworks building at the Town of Stony Point Wastewater Treatment Plant to replace outdated and undersized equipment. The facility will improve plant capacity, reliability, and compliance, enabling the treatment plant to manage peak wet-weather flows, prevent sanitary sewer overflows, and protect local water quality. The project will replace pumps, bar screens, and grit removal systems that are currently beyond their useful life, ensuring the plant can reliably process wastewater and meet regulatory requirements.

This project is an appropriate use of taxpayer funds because it addresses long-standing wastewater infrastructure challenges that directly impact public health and environmental quality. By eliminating recurring sanitary sewer overflows and restoring compliance with state and federal regulations, the project will prevent untreated wastewater from entering the environment and protect local waterways. In addition to safeguarding public health, the project provides a long-term, sustainable solution for wastewater management, strengthening the Town's infrastructure and ensuring reliable, modern treatment capacity for current and future residents. The investment delivers measurable, lasting benefits to the community and the environment, making it a responsible and effective use of federal resources.

The project has a federal nexus because the funding provided is for purposes authorized by Section 603(c) of the Clean Water Act.

I certify that I have no financial interest in this project, and neither does anyone in my immediate family.

Sincerely,

A handwritten signature in black ink that reads "Michael Lawler".
